
Sonus Product Documentation

Ribbon Communications is currently rebranding the software and customer docs on a per-product release basis after the recent merger of Sonus Networks, Inc. and GENBAND (GB). Separate GB / Sonus branding may exist in the documents until the rebranding is completed.

Rebrand (may span multiple releases):

- Product documents supporting current and future development release enhancements/updates; additional doc rebranding will occur based on availability of resources
- Ribbon Communications logo, copyright notices will automatically get propagated into new documents and documents under revision

Rebrand exclusions:

- Discontinued or slated for discontinuation, end of life (EOL) or manufacture discontinued (MD) products
- No retroactive rebranding; only current and future development releases are targeted
