
GET q850tosipmappingtable id

REST API Method: **GET /rest/q850tosipmappingtable/{identifier}**

Retrieves all resource schema elements and values of a Q.850 to SIP Override Table based on a requested Table ID.

If no Table ID is specified in the GET, a listing of all Q.850 to SIP Override Tables will be returned along with their associated Table IDs. These table identifiers can be used to collect resource schema element values via the [GET q850tosipmappingtable id](#) method.
