

POST sbaconfig - action applysectemplate

REST API Method: **POST**

[/rest/sbaconfig?action=applysectemplate](#)

This action applies a security template to the node to prevent unauthorized changes from being made to the system.

Ensure that the SBA is fully setup and services are up and running prior to applying the security template using the [enablesvc action](#) . Ensure that all Lync call flows are fully tested prior to apply the security template. Failure to follow the correct order of steps may result in undesirable behavior.

An HTTP Status 200 return for this action only means that the request was successfully received by the system. Status of the action must be retrieved using the [SBA Action Status Resource](#) .
