
GET q850tosipmappingtable id - q850tosipmapping

REST API Method: GET

[/rest/q850tosipmappingtable/{identifier}/q850tosipmapping](#)

Retrieves all resource schema elements and values of a Q.850 Cause Code to SIP Mapping Table Entry based on a requested Table Entry ID in a given [Q.850 to SIP Override Table](#).

If no Table Entry ID is specified in the GET, a listing of all Q.850 Cause Code to SIP Mapping Table Entries will be returned along with their associated Table Entry IDs. These table entry identifiers can be used to collect resource schema element values via the [GET q850tosipmappingtable id - q850tosipmapping id method](#).
