
GET tonetable id - toneprofile

REST API Method: **GET /rest/tonetable/{identifier}/toneprofile**

Retrieves all resource schema elements and values of a Tone Profile Entry based on a requested Table Entry ID in a given [Tone Table](#).

If no Table Entry ID is specified in the GET, a listing of all Tone Profile Entries will be returned along with their associated Table Entry IDs. These table entry identifiers can be used to collect resource schema element values via the [GET tonetable id - toneprofile id](#) method.
