

GET powersupply id

REST API Method: **GET /rest/powersupply/{identifier}**

This resource returns inventory and operational data for the SBC 2000's pluggable power supplies.

 This resource is only applicable to the SBC 2000. On the SBC 1000 a query for this resource will return a app_code 404

 As viewed from the rear of the SBC 2000 /rest/powersupply/1 is the left-hand power supply, /rest/powersupply/2 is the right-hand power supply

 If no ID is specified in the GET, a listing of all Power Supply resources will be returned along with their associated IDs. These table identifiers can be used to collect resource schema element values via the [GET powersupply id](#) method.
