# SBC 1000 / SBC 2000 Requirements

---

The Sonus SBC 1000/2000 is controlled by a "web application", and users interact with it through web browsers from any computer.

## SBC Edge Client Software Requirements

### Platforms

Please read the [Supported Platforms](#) page for SBC Edge which lists the required server and client software supported by **Sonus SBC 1000/2000 6.0.0**, including:

- Browsers
- Devices (if you are connecting SIP end-points)
- Application software (if you integrating SBC Edge with remote authentication systems)

Please also read the information below regarding client software requirements for SBC Edge.

### Browser

- If you have disabled JavaScript in your browser or are using a script blocking tool like NoScript, you must enable your browser to execute JavaScript to access SBC Edge core WebUI functionality.
- If you have disabled pop-up dialogs in your browser, or are using a pop-up blocking software, you must configure your browser to allow popups to access SBC Edge core WebUI functionality

## SBC Edge Hardware Requirements

Before installing a SBC 1000 or SBC 2000 chassis, verify that your installation site meets the following requirements:

- [Safety Requirements](#)
- [Equipment Rack Requirements](#)
- [Power Connection Requirements](#)
- [Chassis Mounting Space Requirements](#)
- [Restricted Access Location Requirements](#)
- [System Grounding Requirements](#)
