
GET sipsg id - sipsgsession id

REST API Method: GET

[/rest/sipsg/{identifier}/sipsgsession/{identifier}](#)

Retrieves Sessions Data for a given ID under a SIP SG.

If no ID is specified in the GET, a listing of all session data instances will be returned with their IDs.

URL:

<https://192.168.0.111/rest/sipsg/{identifier}/sipsgsession/{identifier}>

HTTP Method

GET

Requires Authentication:

true

Parameters

Name	Required	Values	Description
filter	No	runtime	The type of filtered information in the response. If no filters are specified, all get applied.
