
GET bricard id - telcobriport id

REST API Method: GET

`/rest/bricard/{identifier}/telcobriport/{identifier}`

Retrieves all resource schema elements and values of a BRI Port based on a requested Table ID in a given BRI Card.

If no Table ID is specified in the GET, a listing of all DS1 Ports will be returned along with their associated Table IDs. These table identifiers can be used to collect resource schema element values via the [GET bricard id - telcobriport id](#) method.

URL:

`https://192.168.0.111/rest/bricard/{identifier}/telcobriport/{identifier}`

HTTP Method

GET

Requires Authentication:

true
