
GET sipcontactregistrant id - sipregistrantentry id - registrantstatus id

REST API Method: **GET**

[/rest/sipcontactregistrant/{identifier}/sipregistrantentry/{identifier}/registrantstatus/{identifier}](#)

Retrieves all resource schema elements and values of a SIP Contact Registration Status within a requested SIP Contact Registrant Entry .

If no Entry ID is specified in the GET, a listing of all SIP Contact Registration Status entries in the given SIP Contact Registrant entry will be returned along with their associated IDs. These entry identifiers can be used to collect resource schema element values via the [GET sipcontactregistrant id - sipregistrantentry id - registrantstatus id](#) method.
