# POST sipremoteauthable id

---

## REST API Method: **POST** /rest/sipremoteauthable/{identifier}

Modifies a SIP Remote Authorization Table given a specific Table ID.

### URL:

https://192.168.0.111/rest/sipremoteauthable/{identifier}

### HTTP Method

POST

### Requires Authentication:

true

### Parameters

Parameter Name	Required	Service Affecting	Data Type	Default Value	Possible Values	Description
Description	No	No	string	none	64 - Max Length	Describes the User Credential (RemoteAuthorization) Table so that it is easily identifiable.
Sequence	No	No	string	none	2000 - Max Length	Comma separated string containing the IDs of the User Credential (Remote Authorization) Entries in the table in the order desired.

#### Helpful Tip

The POST can contain either only the attributes that are being updated, or the full set of attributes for the resource
