

GET fan id

REST API Method: **GET /rest/fan/{identifier}**

Retrieves all resource schema elements and values of a Fan with a requested ID.

 This resource is only applicable to the SBC 2000. On the SBC 1000 a query for this resource will return a app_code 404

 If no ID is specified in the GET, a listing of all Fan resources will be returned along with their associated IDs. These table identifiers can be used to collect resource schema element values via the [GET fan id](#) method.
