
POST sbaconfig - action installwindowsupdates

REST API Method: POST

[/rest/sbaconfig?action=installwindowsupdates](#)

This operation will download and install the Windows Updates available on the ASM.

This operation will only install Windows Updates approved by Ribbon and previously applied through [sbaupgrade action](#) .

The action can take more than an hour depending on the number of updates in the package.

Some Windows Updates may require an ASM restart, check `rt_PendingRestartNeeded` in [SBA Config Resource](#) .

An HTTP Status 200 return for this action only means that the request was successfully received by the system.

Status of the action must be retrieved using the [SBA Action Status Resource](#) .
