
GET routingtable id - routingentry

REST API Method: **GET /rest/routingtable/{identifier}/routingentry**

Retrieves all resource schema elements and values of a Routing Table Entry based on a requested Table Entry ID in a given [Routing Table](#).

If no Table Entry ID is specified in the GET, a listing of all Routing Table Entries will be returned along with their associated Table Entry IDs. These table entry identifiers can be used to collect resource schema element values via the [GET routingtable id - routingentry id](#) method.
