# GET logicalinterface id

---

## REST API Method: **GET /rest/logicalinterface/{identifier}**

Retrieves all resource schema elements and values of a Logical Interface based on a requested ID.

If no ID is specified in the GET, a listing of all Logical Ports will be returned along with their associated IDs. These identifiers can be used to collect resource schema element values via the GET logicalinterface id method.

### URL:

https://192.168.0.111/rest/logicalinterface/{identifier}

### HTTP Method

GET

### Requires Authentication:

true

### Parameters

Name	Required	Values	Description
filter	No	config	The type of filtered information in the response. If no filters are specified, all get applied.
