
GET sipcontactregistrant id

REST API Method: **GET /rest/sipcontactregistrant/{identifier}**

Retrieves all resource schema elements and values of a SIP Contact Registrant Table based on a requested Table ID.

If no Table ID is specified in the GET, a listing of all SIP Contact Registrant Tables will be returned along with their associated IDs. These identifiers can be used to collect resource schema element values via the [GET sipcontactregistrant id](#) method.
