## ***VX900 T1/E1 Cabling Notice***

The following is an important notice for using VX900 T1/E1 interface card with NET Part Numbers 035999, 036665, 036001, and 036000.

All interconnections to the VX900 T1/E1 interface cards with NETpart numbers 035999, 036665, 036001, and 036000 are intra building only, and not for outside plant connection. The connections for these T1/E1 interface cards are assumed to connect to a UL Listed PBX, NCTE (Network Channel Terminal Equipment) or CSU/DSU (Channel Services Unit / Digital Services Unit) unit, co-located with the SHOUT900/VX900 systems, or other certified network equipment which provides the required protection for outside plant lines which may be connected to this equipment.

## ***CPU Connections***

For information on CPU Connections, see the [Nodal Controller Feature Module](#) topic.

## ***Console Port***

The console port (COM 1) accepts a standard 9-pin D connector and is used for initial system setup.
