
GET siplocalregistrartable id

REST API Method: **GET /rest/siplocalregistrartable/{identifier}**

Retrieves all resource schema elements and values of a SIP Local Registrar Table based on a requested Table ID.

If no Table ID is specified in the GET, a listing of all SIP Local Registrar Tables will be returned along with their associated Table IDs. These table identifiers can be used to collect resource schema element values via the [GET siplocalregistrartable id](#) method.
