
POST system - action reboot

REST API Method: `POST /rest/system?action=reboot`

This action reboots the SBC Edge system.

The client needs to wait till the system is up before executing any further REST requests. Once the system comes back up, REST client will have to login again

URL:

`https://192.168.0.111/rest/system?action=reboot`

HTTP Method

POST

Requires Authentication:

true
