# GET voicecodeprofile

---

## REST API Method: [GET /rest/voicecodeprofile](#)

Retrieves all resource schema elements and values of a Voice Codec Profile Table based on a requested Table ID.

If no Table ID is specified in the GET, a listing of all Voice Codec Profile Tables will be returned along with their associated Table IDs. These table identifiers can be used to collect resource schema element values via the [GET voicecodeprofile id](#) method.

### URL:

<https://192.168.0.111/rest/voicecodeprofile>

### HTTP Method

GET

### Requires Authentication:

true

### Parameters

Name	Required	Values	Description
filter	No	config	The type of filtered information in the response. If no filters are specified, all get applied.
