

ENUM Domain Name ID

In this section:

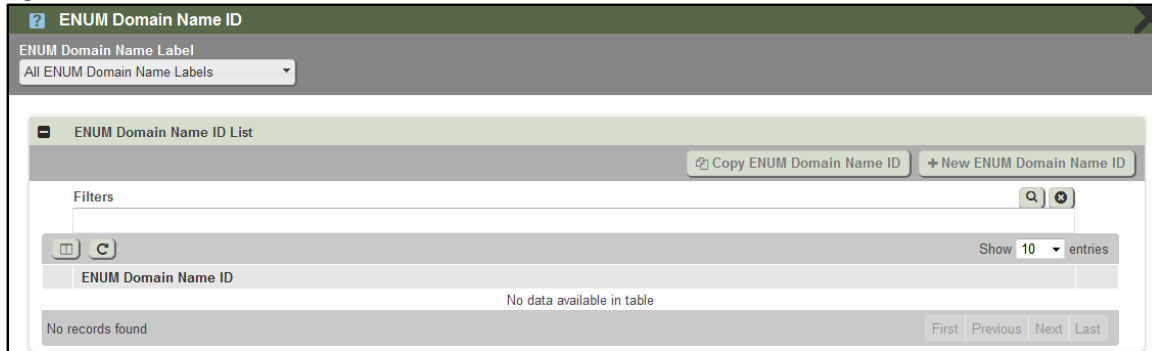

- To View ENUM Domain Name IDs
- To Create an ENUM Domain Name ID

This object specifies the ENUM Domain Name ID for ENUM Domain Name Labels.

To View ENUM Domain Name IDs

On the SBC main screen, go to **All > Global > Servers > ENUM Domain Name Label > ENUM Domain Name ID**. The ENUM Domain Name ID window is displayed.

Figure 1: ENUM Domain Name ID

The ENUM Domain Name ID can be checked for each ENUM Domain Name Label created. Use the drop-down box to select the desired ENUM Domain Name Label.

! Currently, the SBC supports only one default ENUM Domain Name Label: **DEFAULT_ZONE_LABEL**.

To Create an ENUM Domain Name ID

To create a new ENUM Domain Name ID, click **New ENUM Domain Name ID** tab on the ENUM Domain Name ID List panel.

The Create New ENUM Domain Name ID window is displayed.

Figure 2: Create New ENUM Domain Name ID

Select an ENUM domain name value and then click **Save**.

Table 1: Call Routing - Servers - Enum Domain Parameters

Parameter	Description
-----------	-------------

ENUM Domain Name ID

This lists the unique ENUM domain names created using the ENUM Domain Name entity. Refer to [Global - Servers - ENUM Domain Name](#).

An ENUM Domain Name ID once created, cannot be edited. It can only be copied or deleted.
