
DSC

Resource - DSC

Defines an DSC managed object.

- GET DSC
- POST DSC
- PUT DSC
- DELETE DSC

Resource - DSCNodes

Defines an DSCNodes managed object.

- GET DSCNodes
- PUT DSCNodes
- PUT DSCNodes - action RestoreDebugDefaults

Resource - DSCNode

Defines an DSCNode managed object.

- GET DSCNode
- POST DSCNode
- PUT DSCNode
- DELETE DSCNode
- PUT DSCNode - action Activate
- PUT DSCNode - action Deactivate
- PUT DSCNode - action ResetTracing
- PUT DSCNode - action ResetIMF
- PUT DSCNode - action RestoreDebugDefaults

Resource - AdjacentDiameterNode

Defines an AdjacentDiameterNode managed object.

- GET AdjacentDiameterNode
- POST AdjacentDiameterNode
- PUT AdjacentDiameterNode
- DELETE AdjacentDiameterNode
- PUT AdjacentDiameterNode - action Activate
- PUT AdjacentDiameterNode - action Deactivate

Resource - ADNConnection

Defines an ADNConnection managed object.

- GET ADNConnection
- POST ADNConnection
- PUT ADNConnection
- DELETE ADNConnection
- PUT ADNConnection - action Activate

- PUT ADNConnection - action Deactivate

Resource - AdvertisedCapability

Defines an AdvertisedCapability managed object.

- GET AdvertisedCapability
- POST AdvertisedCapability
- DELETE AdvertisedCapability

Resource - TransportServer

Defines an TransportServer managed object.

- GET TransportServer
- POST TransportServer
- PUT TransportServer
- DELETE TransportServer
- PUT TransportServer - action Activate
- PUT TransportServer - action Deactivate

Resource - AllowedIP

Defines an AllowedIP managed object.

- GET AllowedIP
- POST AllowedIP
- PUT AllowedIP
- DELETE AllowedIP

Resource - ServerPool

Defines an ServerPool managed object.

- GET ServerPool
- POST ServerPool
- PUT ServerPool
- DELETE ServerPool
- PUT ServerPool - action Activate
- PUT ServerPool - action Deactivate

Resource - MemberDiameterID

Defines an MemberDiameterID managed object.

- GET MemberDiameterID
- POST MemberDiameterID
- PUT MemberDiameterID
- DELETE MemberDiameterID

Resource - PoolApplicationID

Defines an PoolApplicationID managed object.

- GET PoolApplicationID
- POST PoolApplicationID
- DELETE PoolApplicationID

Resource - IncomingADNRoutingTable

Defines an IncomingADNRoutingTable managed object.

- GET IncomingADNRoutingTable
- POST IncomingADNRoutingTable
- DELETE IncomingADNRoutingTable

Resource - IncomingADNRoutingRecord

Defines an IncomingADNRoutingRecord managed object.

- GET IncomingADNRoutingRecord
- POST IncomingADNRoutingRecord
- PUT IncomingADNRoutingRecord
- DELETE IncomingADNRoutingRecord

Resource - CommandCodeRoutingTable

Defines an CommandCodeRoutingTable managed object.

- GET CommandCodeRoutingTable
- POST CommandCodeRoutingTable
- DELETE CommandCodeRoutingTable

Resource - CommandCodeRoutingRecord

Defines an CommandCodeRoutingRecord managed object.

- GET CommandCodeRoutingRecord
- POST CommandCodeRoutingRecord
- PUT CommandCodeRoutingRecord
- DELETE CommandCodeRoutingRecord

Resource - ApplicationIDRoutingTable

Defines an ApplicationIDRoutingTable managed object.

- GET ApplicationIDRoutingTable
- POST ApplicationIDRoutingTable
- DELETE ApplicationIDRoutingTable

Resource - ApplicationIDRoutingRecord

Defines an ApplicationIDRoutingRecord managed object.

- GET ApplicationIDRoutingRecord
- POST ApplicationIDRoutingRecord
- PUT ApplicationIDRoutingRecord
- DELETE ApplicationIDRoutingRecord

Resource - AVPRoutingTable

Defines an AVPRoutingTable managed object.

- GET AVPRoutingTable
- POST AVPRoutingTable
- PUT AVPRoutingTable
- DELETE AVPRoutingTable

Resource - AVPRoutingRecord

Defines an AVPRoutingRecord managed object.

- GET AVPRoutingRecord
- POST AVPRoutingRecord
- PUT AVPRoutingRecord
- DELETE AVPRoutingRecord

Resource - ResultTable

Defines an ResultTable managed object.

- GET ResultTable
- POST ResultTable
- PUT ResultTable
- DELETE ResultTable

Resource - ResultRecord

Defines an ResultRecord managed object.

- GET ResultRecord
- POST ResultRecord
- PUT ResultRecord
- DELETE ResultRecord

Resource - ModificationTable

Defines an ModificationTable managed object.

- GET ModificationTable
- POST ModificationTable
- DELETE ModificationTable

Resource - ModificationRecord

Defines an ModificationRecord managed object.

- GET ModificationRecord
- POST ModificationRecord
- PUT ModificationRecord
- DELETE ModificationRecord

Resource - RealmRoutingTable

Defines an RealmRoutingTable managed object.

- GET RealmRoutingTable
- POST RealmRoutingTable
- DELETE RealmRoutingTable

Resource - RealmRoutingRecord

Defines an RealmRoutingRecord managed object.

- GET RealmRoutingRecord
- POST RealmRoutingRecord
- PUT RealmRoutingRecord
- DELETE RealmRoutingRecord

Resource - TopologyMappingTable

Defines an TopologyMappingTable managed object.

- GET TopologyMappingTable
- POST TopologyMappingTable
- DELETE TopologyMappingTable

Resource - TopologyOneToOnePublicMapping

Defines an TopologyOneToOnePublicMapping managed object.

- GET TopologyOneToOnePublicMapping
- POST TopologyOneToOnePublicMapping
- PUT TopologyOneToOnePublicMapping
- DELETE TopologyOneToOnePublicMapping

Resource - TopologyOneToNPublicMapping

Defines an TopologyOneToNPublicMapping managed object.

- GET TopologyOneToNPublicMapping
- POST TopologyOneToNPublicMapping
- PUT TopologyOneToNPublicMapping
- DELETE TopologyOneToNPublicMapping

Resource - DSCRoutingSearchUtility

Defines an DSCRoutingSearchUtility managed object.

- GET DSCRoutingSearchUtility
- PUT DSCRoutingSearchUtility
- PUT DSCRoutingSearchUtility - action ClearSearchCriteria
- PUT DSCRoutingSearchUtility - action PerformSearch

Resource - DSCTableRecord

Defines an DSCTableRecord managed object.

- GET DSCTableRecord

Resource - DSCCandidateOutgoingADN

Defines an DSCCandidateOutgoingADN managed object.

- GET DSCCandidateOutgoingADN

Resource - SCTPParameterSet

Defines an SCTPParameterSet managed object.

- GET SCTPParameterSet
- POST SCTPParameterSet
- PUT SCTPParameterSet
- DELETE SCTPParameterSet

Resource - DiameterProtocolParameterSet

Defines an DiameterProtocolParameterSet managed object.

- GET DiameterProtocolParameterSet
- POST DiameterProtocolParameterSet
- PUT DiameterProtocolParameterSet
- DELETE DiameterProtocolParameterSet

Resource - CERParameterSet

Defines an CERParameterSet managed object.

- GET CERParameterSet
- POST CERParameterSet
- PUT CERParameterSet
- DELETE CERParameterSet

Resource - CERApplicationID

Defines an CERApplicationID managed object.

- GET CERApplicationID
- POST CERApplicationID
- DELETE CERApplicationID

Resource - CERSupportedVendorID

Defines an CERSupportedVendorID managed object.

- GET CERSupportedVendorID
- POST CERSupportedVendorID
- DELETE CERSupportedVendorID

Resource - CapacityParameterSet

Defines an CapacityParameterSet managed object.

- GET CapacityParameterSet
- POST CapacityParameterSet
- PUT CapacityParameterSet
- DELETE CapacityParameterSet

Resource - SecurityParameterSet

Defines an SecurityParameterSet managed object.

- GET SecurityParameterSet
- POST SecurityParameterSet
- PUT SecurityParameterSet
- DELETE SecurityParameterSet

Resource - RateLimiter

Defines an RateLimiter managed object.

- GET RateLimiter
- POST RateLimiter
- PUT RateLimiter
- DELETE RateLimiter

Resource - ApplicationIDDefinition

Defines an ApplicationIDDefinition managed object.

- GET ApplicationIDDefinition
- POST ApplicationIDDefinition
- DELETE ApplicationIDDefinition

Resource - VendorIDDefinition

Defines an VendorIDDefinition managed object.

- GET VendorIDDefinition
- POST VendorIDDefinition
- DELETE VendorIDDefinition

Resource - AVPDefinitions

Defines an AVPDefinitions managed object.

- GET AVPDefinitions

Resource - AVPDefinition

Defines an AVPDefinition managed object.

- GET AVPDefinition
- POST AVPDefinition
- PUT AVPDefinition
- DELETE AVPDefinition

Resource - AVPAliasDefinition

Defines an AVPAliasDefinition managed object.

- GET AVPAliasDefinition
- POST AVPAliasDefinition
- DELETE AVPAliasDefinition

Resource - RealmDefinition

Defines an RealmDefinition managed object.

- GET RealmDefinition
- POST RealmDefinition
- PUT RealmDefinition
- DELETE RealmDefinition

Resource - MobileCodesDefinitions

Defines an MobileCodesDefinitions managed object.

- GET MobileCodesDefinitions

Resource - IMSIMobileCode

Defines an IMSIMobileCode managed object.

- GET IMSIMobileCode
- POST IMSIMobileCode
- DELETE IMSIMobileCode

Resource - CommandCodeDefinition

Defines an CommandCodeDefinition managed object.

- GET CommandCodeDefinition
- POST CommandCodeDefinition
- PUT CommandCodeDefinition
- DELETE CommandCodeDefinition

Resource - MSAC

Defines an MSAC managed object.

- GET MSAC
- POST MSAC
- PUT MSAC
- DELETE MSAC

Resource - MSA

Defines an MSA managed object.

- GET MSA
- POST MSA
- PUT MSA
- DELETE MSA

Resource - ProcessEvents

Defines an ProcessEvents managed object.

- GET ProcessEvents
- POST ProcessEvents
- PUT ProcessEvents
- DELETE ProcessEvents

Resource - ProcessEvent

Defines an ProcessEvent managed object.

- GET ProcessEvent
- POST ProcessEvent
- PUT ProcessEvent
- DELETE ProcessEvent
