

Resetting a Local User Password

NOTE:

This function is available for Administrators only.

Helpful Tip: You can change your own password using the [Change Password](#) facility

To reset a local user password:

1. In the WebUI, click the **Settings** tab.
2. In the left navigation pane, go to **Security > Users > Local User Management**.

Figure 1: Local Users Table

<input type="checkbox"/>	User Name	Access Level	Reset Password	Account Active	Password Expiry
<input type="checkbox"/>	admin	Administrator	Reset Password	Yes	Infinite
<input type="checkbox"/>	rest	REST	Reset Password	Yes	Infinite
<input type="checkbox"/>	A11360013	Administrator	Reset Password	Yes	Infinite

Reset a Local User Password

1. Click the **Reset Password** link on the far right side of the local user row for the user who's password you wish to reset.

Figure 2: Reset User Password

Reset User Password March 18, 2014 10:42:38

User Name: admin

Password: * [Password Rules](#)

Confirm Password: *

OK

Note

If [Enhanced Password Security](#) is enabled, the new user is prompted to enter a new password when they first attempt to log into the SBC. The user is not allowed to login until a new password that meets the [specified criteria](#) is successfully entered.

Reset User Password - Field Definitions

Password/Confirm Password

Specifies the user's new password. Passwords must be 128 characters or less. Passwords may contain a combination of letters, numbers, and special characters. The minimum password length and combination of characters depend on the options specified in the [Global Security Options](#) page.
