# Configuring the DSC - SP2000 Platforms

---

## Table of Contents

### **Ribbon DSC Application Guide**

This guide is only applicable to the DSC Platforms. It provides instructions for setting up, provisioning, and maintaining the DSC Platforms.

### **SS7 Application Guide 1**

This guide provides instructions for provisioning the DSC - SP2000 Platforms and describes tasks such as configuring SS7 interfaces, SS7 linksets and links, routesets and routes. The guide also provides information about obtaining data measurements for the system.

### **SS7 Application Guide 2**

This guide provides descriptive and procedural information for the Signaling Gateway (SG), Signaling Connection Control Part (SCCP), Gateway Screening and MSU Tracing (GWST), Global Title Translation (GTT), Point Code Emulator (PCE), and Integrated Monitoring Feed (IMF), and Intelligent Network Application Protocol Gateway (INAPGW) applications.

The SS7 Level 4 Protocol Converter has been merged with the SS7 Application Guide 2.
